The Marketing Section moves

Since Tandberg Data A/S was established as a company in the spring of 1979, the number of employees has increased from approximately 250 to about 330 at present. To provide room for all the new people we bought 250 square meters of provisional wooden huts in the autumn of 1980 and placed them in the park. This Easter another 1150 square meters of huts across the road are waiting to be moved into.

So, after Easter, the Marketing Section, comprising the Marketing-, Sales-, and Service Departments will be out in the woods. To save themselves a lot of running, they have installed their own telex machine with a new number. The telephone number is not changed.

The NEW TELEX NUMBER to the Marketing Section is:

72663 tdata n

Opening hours during holidays

Tandberg Data will be closed for Easter from April 5th to April 12th. However, the Service Department will have people on duty on the 5th, 6th, and 7th. They can be reached on their direct number:

(47-2) 23 21 82

We keep closed again in week 20 due to national holidays, but the Service Department can be reached on their direct number on the 18th, 19th and 21st of May.

Optional equipment for the TDV 2200

Three options are now offered to the TDV 2200 Series Display Terminal user:

Security Lock Option Kit

The TDV 2200 Security Lock Option Kit offers the TDV 2200 user means for access control to the terminal, provided by two key-operated locks positioned in the top right corner of the keyboard unit.

One lock is always used to control access to the terminal and prevents unauthorized persons from using the terminal. When the lock is closed, the terminal display is turned off and no input will be accepted from the keyboard or the communication line.

The other lock is, for the standard Tandberg Data TDV 2200 Series products, always used to control the access to the Soft-switches and the PUSH-keys. Menus 2 and 3 can only be entered when the lock is open.

The kit may be factory installed when the keyboard is ordered, or it can be installed in the field by a qualified technician. The kit contains a reference/installation manual and all the necessary parts for field installation.

For detailed information, ask for the "Security Lock Option Kit Reference Manual", publ. no. 5302, part no. 394174.

Video Output Option Kits

The TDV 2200 Video Output Option Kits offer the TDV 2200 Series Display Terminal user means for connecting different types of video monitors to the terminal.

Two different kits are available. Kit 1 is intended for use with video monitors with a line frequency of 15.6 kHz and Kit 2 is intended for video monitors with a line frequency of 20.1 kHz.

The kits consist mainly of a video output board which is mounted within the terminal and it provides the composite video output signal (video and sync) required by the video monitor. The connection to the video monitor is made using a 75 ohm coaxial cable.

The kits may be factory installed when the terminal is ordered, or they can be installed in the field by a qualified technician. The kits contain a reference/installation manual and all the necessary parts for field installation.

For detailed information, ask for the "Video Output Option Kits Reference Manual", publ. no. 5323, part no. 394167.

Magnetic Card Reader Option Kit

The TDV 2200 Magnetic Card Reader Option Kit is a manually operated magnetic card reader designed to read data stored on magnetic cards according to ABA and SIPASS® industry standard formats (track 2), into the terminal.

The kit may be used for increased security by providing individual access control to the host computer, or for fast and easy data entry of personal account numbers, etc.

The card reader may be used either free-standing or attached to the keyboard. The card reader is connected to the keyboard through a single cable, and data read from the the magnetic cards is transferred via the keyboard and received by the terminal as keyboard data.

When the card is removed from the reader after having been read, this is detected and signalled to the terminal (and host computer) for increased security.

A card-stop bracket may be mounted on the reader assembly providing a retainer for the card when it has been pulled through the reader and it is required that the card remain in the reader.

The Card Reader is delivered as a kit only. It contains documentation and all necessary parts for easy field installation by the user.

For detailed information, ask for the "Magnetic Card Reader Option Reference Manual", publ. no. 5314, part 390338.

New display computer - TDV 2324

Our new display computer, the TDV 2324, is now being produced. It replaces the TDV 2114/24 which has been around since 1976. The TDV 2324 is program compatible with the TDV 2124 and will be available in three versions:

TDV 2324-1: one 1 MByte diskette drive

TDV 2324-2: two 1 MByte diskette drives

TDV 2324-3: one 1 MByte diskette drive and one hard disk drive.

The TDV 2324 is offered with two operating systems; TOS-II or CP/M®. The high level languages PASCAL and COBOL can be utilized under TOS-II.

An integrated display controller results in instantaneous response on the screen.

Communication software for Honeywell Bull VIP 7700, U 200 Univac, and HASP/JES2 for IBM is available.

For further information about the TDV 2324 Display Computer, please contact our sales department.

New faces at Tandberg Data

WILLY HAUGE

Willy Hauge is a graduate engineer from Gøteborgs Tekniska Institut. He has worked for the Norwegian telephone company and for Norconsult A/S in Saudi-Arabia and West-Germany. Willy now works in our Sales Administration Department where he is responsible for the West-Germany region.

HEIDI IRENE BECH

Heidi Irene Bech has previously worked for Polar Express and Olivetti. She is now employed as secretary in our Marketing Department.

THORMOD KNUITSEN

Thormod Knutsen is a graduate engineer from Kongsberg Ingeniørhøyskole. He has previously worked for H. Gunnerud Elektriske Radio og TV. Thormod now works in our Service Department.

New TOS-II release

TOS, V.2.2-8 has been released. This is an upgraded version of TOS, V.2.1-1.

Please note that there are four versions:

1. A version containing the Tandberg Data Double Density Diskette Handler (D-device) only. This version is intended to run on machines with one double density diskette drive (TDV 2124 or TDV 2324-1).

Available from our Sales Department, ordering number 961203.

2. A version containing

TD Double Density Diskette Handler (D-device)
TD Single Density Diskette Handler (F-device)
IBM Double Density Diskette Handler (I-device)
IBM Single Density Diskette Handler (J-device)

where all handlers are transient. This version is intended to run on machines with two double density diskette drives (TDV 2124 or TDV 2324-2.)

3. A version containing

TD Double Density Diskette Handler (D-device)
TD Single Density Diskette Handler (F-device)
TD Hard Disk Handler (H-device)
IBM Double Density Diskette Handler (I-device)
IBM Single Density Diskette Handler (J-device)

where all handlers are transient. This version is intended to run on machines with one double density diskette drive and one hard disk (TDV 2324-3.)

4. A special version containing

TD Double Density Diskette Handler (D-device)
TD Single Density Diskette Handler (F-device)
TD Hard Disk Handler (H-device)

where all handlers are transient. This version is also called SYSTEM BULK. It is used only when making special configurations of the operating system TOS-II. It contains a SYSGEN program and a few utilities used by SYSGEN. It also contains all relocatable objects of TOS-II and the UTILITIES. This version requires a machine with either two double density diskette drives or one double diskette drive and one hard disk.

Available from our Sales Department, ordering number 961049.

The main difference as compared to version 2.1-1 is the introduction of hard disk under the operating system for TDV 2324-3.

Some minor errors reported are also corrected.

Hardware training courses

SPRING 1982

TDV 2200 HARDWARE TRAINING COURSE, 2 days

Contents: TDV 2200 hardware description.
Test, adjustment, troubleshooting aids and
procedures.

Time: 11th - 12th March.
This course will be repeated 19th - 20th April
10th - 11th May
7th - 8th June.

Training fee: NOK 2900,- including lunch, refreshments,
and documentation.

TDC 3200 HARDWARE TRAINING COURSE, 3 days

Contents: Overall system description.
Hardware/firmware description.
Test, adjustment, troubleshooting aids,
and documentation.

Time: 12th - 14th May

Training fee: NOK 3850,- including lunch, refreshments,
and documentation.

New representative in France

JOD Electronique is the latest addition to Tandberg Data's list of representatives. The firm was established in 1980, and is lead by Mr. Jaques Ouanono. The agreement with JOD was made in December 1980, and concerns tape products for the French market.

Address, telephone-, and telex numbers are included in the updated list of representatives on the next page.

We wish Mr. Ouanono and his firm the best of luck in the French market, and welcome on the team!

TDV 2200 Service Manual

The TDV 2200 Service Manual is now available. It replaces the TDV 2200 Hardware Manual, and contains more detailed descriptions and updated schematic diagrams.

The manual can be ordered from our Service Department.
Ordering number: 961326 - Price: NOK 600.-

The following sections are included:

- Introduction
- Specifications and Installation Guide
- User's Guide
- Location and Interconnection
- Switch Setting Overview
- Mainboard
- Power/Deflection 1 and 2 (incl. Tube board)
- Keyboard
- Illustrated Parts List
- Servicing

Descriptions of the options must be ordered separately. A spare section in the Service Manual is intended for the filing of option descriptions.

Ordering numbers are as follows:

Publication title	Publ. no.	Ordering no.
TDV 2200 Optional Interface Adapters	5229	394532
TDV 2200 Memory Module	5228	392851
